Reporting and Self-Assessment Template

The following template sets out the reporting and self-assessment requirements for Signatories of the Principles for Responsible Banking (PRB). Your bank discloses which actions it has undertaken to implement the PRB by self-assessing its progress on each of the 6 Principles. This template is therefore structured in accordance with the 6 Principles that signatories have committed to.

Three **Key Steps** are critical to showing that your bank is fulfilling its commitments as a signatory of the PRB, i.e. Impact Analysis, Target Setting & Implementation and Assured Reporting/Accountability. The sections in the Reporting and Self-Assessment Template that relate to the 3 Key Steps also require a self-assessment summary to demonstrate the extent to which the bank has fulfilled the respective requirements of the Key Steps.

**Accommodating different starting points**

Your bank has an initial four-year period from signing to implement the 6 Principles including to bring its reporting fully in line with the requirements. Your bank may not be able to provide all information required in this template in the first report. You should build on your implementation progress annually. Feedback, support, capacity building, training and peer learning are available to all signatory banks to help them progress with both implementation and reporting.

**Timeline for reporting and assurance**

Signatory banks need to report on their implementation of the Principles on an annual basis. The first PRB report has to be published within 18 months of signing the Principles, to give the bank some flexibility to align the PRB reporting with its reporting cycle. Publishing the first PRB report at any point earlier than 18 months after signing the Principles is therefore an option. After the first PRB reporting has been published, subsequent reports have to be published annually thereafter, i.e. within 12 months at the latest after the prior report.

**Assurance**

The last report within the initial 4 year implementation period (and subsequent reports thereafter) needs to be assured, which means that at least the third PRB report needs to be assured. Banks are encouraged to put the assurance process in place well before that and have earlier PRB reports already assured.

---

1 Early reporting is permitted, although sufficient time to show progress from one year to the other should be taken into account.
All items that relate to the three Key Steps require limited assurance by year four of signing the PRB, undertaken by an independent third party with relevant expertise in the field. These are:

- 2.1 Impact Analysis
- 2.2 Target Setting
- 2.3 Target Implementation and Monitoring
- 5.1 Governance Structure for Implementation of the Principles

An assurer provides limited assurance of your self-assessment in these listed areas. You can do this by including it in your existing assured reporting. Where third-party assurance is not feasible, an independent review may be conducted. Assurance requirements are described in more detail in the Guidance for Assurance providers: Providing limited assurance for reporting.

**Purpose of the template**

The purpose of this template is to assist signatories in disclosing their progress on implementing the PRB. The disclosed information is used by the UNEP FI Secretariat as the basis for the individual review of each bank’s progress, as well as for reporting the collective progress made by the PRB Signatory Group. To measure collective progress in a consistent manner, some standardized questions to be completed by the banks are integrated into the template. The open questions give banks the flexibility to disclose the progress they make, considering the diverse business models and various contextual differences in which banks operate.

**How to use this template**

This template gives banks the chance to provide summaries of the annual progress made in implementing each Principle. It is designed for your bank to provide references/links to where in your existing reporting/public domains (websites) the required information can be found to support your answers. The aim is to keep any additional reporting burden to a minimum while ensuring transparency and accountability as set out in Principle 6. When referring to other documents, please specify the pages where the exact information appears.

The Reporting and Self-Assessment Template shall not be amended structurally and content-wise. The content and text of the template can be applied to corporate layout and designed accordingly, without omitting parts of the texts. The Reporting and Self-Assessment Template can be integrated into your bank’s reports (annual report, sustainability report or relevant reporting formats) or can be published as a stand-alone document. It needs to be publicly available and will be listed on the UNEP FI Signatories page.

The reporting needs to be published in English. Information that is referenced to within the Reporting and Self-Assessment Template should also be available in English. Where that is not possible, it is recommended to include the summary of relevant information as text in the Template, so that all necessary information can be taken into account when the UNEP FI Secretariat reviews the bank’s performance.
Principle 1: Alignment

We will align our business strategy to be consistent with and contribute to individuals’ needs and society’s goals, as expressed in the Sustainable Development Goals, the Paris Climate Agreement and relevant national and regional frameworks.

1.1 Business model

Describe (high-level) your bank’s business model, including the main customer segments served, types of products and services provided, the main sectors and types of activities across the main geographies in which your bank operates or provides products and services. Please also quantify the information by disclosing e.g. the distribution of your bank’s portfolio (%) in terms of geographies, segments (i.e. by balance sheet and/or off-balance sheet) or by disclosing the number of customers and clients served.

Response

For the last 130 years, Banco de la Nación Argentina has contributed to the development of the productive sectors of the country, providing financial assistance to micro, small and medium-sized companies that develop agricultural, industrial, commercial, service and technological activities; it also enable foreign trade, especially stimulating exports of Argentinian goods, services and technology. To support them, it makes credit for investment and working capital available to companies that produce goods and services, also granting financing and guarantees for foreign trade activities. At the same time it assists individuals through personal and mortgage loans for housing and interrelated products. It has a wide national and international geographic coverage, through 758 service subsidiaries throughout the country, and with 10 operating subsidiaries abroad, added to its service channels and telephone and digital communication that generate greater accessibility and inclusion.

The portfolio composition of those who have active products as follows: 87.17% are individuals, 0.99% companies (including the financial sector), 0.03% are public sector and 11.81% are judicial, punishments and joint owners. Regarding geographic distribution, 30.10% are from Buenos Aires, 14.50% from the City of Buenos Aires, and the rest from the interior of the country, reaching 22 provinces, being the ones with the highest percentage: Córdoba (8.00%), Santa Fe (7.30%), Mendoza (6.90%), Tucumán (3.60%) and Entre Ríos (3.00%) and the rest with an average participation of 1.53%.

1.2 Strategy alignment

Does your corporate strategy identify and reflect sustainability as strategic priority/ies for your bank?

☐ Yes

☐ No

Please describe how your bank has aligned and/or is planning to align its strategy to be consistent with the Sustainable Development Goals (SDGs), the Paris Climate Agreement, and relevant national and regional frameworks.
Does your bank also reference any of the following frameworks or sustainability regulatory reporting requirements in its strategic priorities or policies to implement these?

☐ UN Guiding Principles on Business and Human Rights
☒ International Labour Organization fundamental conventions
☒ UN Global Compact
☐ UN Declaration on the Rights of Indigenous Peoples
☐ Any applicable regulatory reporting requirements on environmental risk assessments, e.g. on climate risk - please specify which ones: ---------------------
☐ Any applicable regulatory reporting requirements on social risk assessments, e.g. on modern slavery - please specify which ones: -------------------------
☐ None of the above

Response

Banco Nación creates opportunities for building a sustainable future by fostering alliances with State agencies, civil society organizations, the private sector, and communities. For this reason, it promotes the 2030 Agenda and contributes to the fulfillment of the Sustainable Development Goals (SDG) with a Sustainability Policy that integrates environmental and social priorities in all business activities.

In addition, it adheres to the best international sustainability practices and guidelines with a solid commitment to be a responsible bank, which carries out its activity transparently and ethically, generating value in the economy of people, companies and communities throughout the country.

The Bank annually prepares an analysis of the contribution to the SDGs and the goals prioritized by the National Government, used as a monitoring framework for national indicators and adapting monitoring indicators to financial activity, to make public, through exhaustive analysis, the impact and contribution to the 2030 Agenda.

Principle 2: Impact and Target Setting

We will continuously increase our positive impacts while reducing the negative impacts on, and managing the risks to, people and environment resulting from our activities, products and services. To this end, we will set and publish targets where we can have the most significant impacts.

2.1 Impact Analysis (Key Step 1)
Show that your bank has performed an impact analysis of its portfolio/s to identify its most significant impact areas and determine priority areas for target-setting. The impact analysis shall be updated regularly\(^2\) and fulfil the following requirements/elements (a-d)\(^3\):

**a) Scope:** What is the scope of your bank’s impact analysis? Please describe which parts of the bank’s core business areas, products/services across the main geographies that the bank operates in (as described under 1.1) have been considered in the impact analysis. Please also describe which areas have not yet been included, and why.

**Response**

During 2022, the Bank began its impact analysis, with a launch meeting with members of the areas involved and a first definition of the scope of the portfolios to be analysed, which will include Personal Banking and Business Banking.

**b) Portfolio composition:** Has your bank considered the composition of its portfolio (in %) in the analysis? Please provide proportional composition your portfolio globally and per geographical scope

i) by sectors & industries\(^4\) for business, corporate and investment banking portfolios (i.e. sector exposure or industry breakdown in %), and/or

ii) by products & services and by types of customers for consumer and retail banking portfolios.

If your bank has taken another approach to determine the bank’s scale of exposure, please elaborate, to show how you have considered where the bank’s core business/major activities lie in terms of industries or sectors.

**Response**

At the publication date of this Reporting and Self-Assessment Template, the Bank is evaluating the percentage of the portfolios to be analyzed in the 1st half of 2023.

**c) Context:** What are the main challenges and priorities related to sustainable development in the main countries/regions in which your bank and/or your clients operate?\(^5\) Please describe how these have been considered, including what stakeholders you have engaged to help inform this element of the impact analysis.

This step aims to put your bank’s portfolio impacts into the context of society’s needs.

**Response**

The context analysis will be carried out in the 1st semester of 2023.

---

\(^2\) That means that where the initial impact analysis has been carried out in a previous period, the information should be updated accordingly, the scope expanded as well as the quality of the impact analysis improved over time.

\(^3\) Further guidance can be found in the Interactive Guidance on impact analysis and target setting.

\(^4\) ‘Key sectors’ relative to different impact areas, i.e. those sectors whose positive and negative impacts are particularly strong, are particularly relevant here.

\(^5\) Global priorities might alternatively be considered for banks with highly diversified and international portfolios.
Based on these first 3 elements of an impact analysis, what positive and negative impact areas has your bank identified? Which (at least two) significant impact areas did you prioritize to pursue your target setting strategy (see 2.2)? Please disclose.

**Response**

The impact analysis will be carried out in the 1st semester of 2023.

**d) For these (min. two prioritized impact areas): Performance measurement:** Has your bank identified which sectors & industries as well as types of customers financed or invested in are causing the strongest actual positive or negative impacts? Please describe how you assessed the performance of these, using appropriate indicators related to significant impact areas that apply to your bank’s context.

In determining priority areas for target-setting among its areas of most significant impact, you should consider the bank’s current performance levels, i.e. qualitative and/or quantitative indicators and/or proxies of the social, economic and environmental impacts resulting from the bank’s activities and provision of products and services. If you have identified climate and/or financial health&inclusion as your most significant impact areas, please also refer to the applicable indicators in the [Annex](#).

If your bank has taken another approach to assess the intensity of impact resulting from the bank’s activities and provision of products and services, please describe this.

The outcome of this step will then also provide the baseline (incl. indicators) you can use for setting targets in two areas of most significant impact.

**Response**

The identification of the sectors and industries affected by the impact of the Bank will be reported during the first half of 2023.

---

**Self-assessment summary:**

Which of the following components of impact analysis has your bank completed, in order to identify the areas in which your bank has its most significant (potential) positive and negative impacts?7

- Scope: Yes ☐, In progress X, No ☐
- Portfolio composition: Yes ☐, In progress X, No ☐
- Context: Yes ☐, In progress X, No ☐
- Performance measurement: Yes ☐, In progress X, No ☐

Which most significant impact areas have you identified for your bank, as a result of the impact analysis?

---

6 To prioritize the areas of most significant impact, a qualitative overlay to the quantitative analysis as described in a), b) and c) will be important, e.g. through stakeholder engagement and further geographic contextualisation.

7 You can respond “Yes” to a question if you have completed one of the described steps, e.g. the initial impact analysis has been carried out, a pilot has been conducted.
### Climate change mitigation, climate change adaptation, resource efficiency & circular economy, biodiversity, financial health & inclusion, human rights, gender equality, decent employment, water, pollution, other: please specify

**How recent is the data used for and disclosed in the impact analysis?**
- ☐ Up to 6 months prior to publication
- X Up to 12 months prior to publication
- ☐ Up to 18 months prior to publication
- ☐ longer than 18 months prior to publication

Open text field to describe potential challenges, aspects not covered by the above etc.: (optional)

### 2.2 Target Setting (Key Step 2)

Show that your bank has set and published a minimum of two targets which address at least two different areas of most significant impact that you identified in your impact analysis.

The targets\(^8\) have to be Specific, Measurable (qualitative or quantitative), Achievable, Relevant and Time-bound (SMART). Please disclose the following elements of target setting (a-d), for each target separately:

a) **Alignment**: which international, regional or national policy frameworks to align your bank’s portfolio with\(^9\) have you identified as relevant? Show that the selected indicators and targets are linked to and drive alignment with and greater contribution to appropriate Sustainable Development Goals, the goals of the Paris Agreement, and other relevant international, national or regional frameworks.

   *You can build upon the context items under 2.1.*

**Response**

*Banco Nación*’s challenge is to establish the baseline from the impact analysis during the 1st semester of 2023.

b) **Baseline**: Have you determined a baseline for selected indicators and assessed the current level of alignment? Please disclose the indicators used as well as the year of the baseline.

   *You can build upon the performance measurement undertaken in 2.1 to determine the baseline for your target.*

   *A package of indicators has been developed for climate change mitigation and financial health & inclusion to guide and support banks in their target setting and implementation journey. The overview of indicators can be found in the Annex of this template.*

   If your bank has prioritized climate mitigation and/or financial health & inclusion as (one of) your most significant impact areas, it is strongly recommended to report on the indicators in

---

\(^8\) Operational targets (relating to for example water consumption in office buildings, gender equality on the bank’s management board or business-trip related greenhouse gas emissions) are not in scope of the PRB.

\(^9\) Your bank should consider the main challenges and priorities in terms of sustainable development in your main country(ies) of operation for the purpose of setting targets. These can be found in National Development Plans and strategies, international goals such as the SDGs or the Paris Climate Agreement, and regional frameworks. Aligning means there should be a clear link between the bank’s targets and these frameworks and priorities, therefore showing how the target supports and drives contributions to the national and global goals.
the Annex. Please include the relevant indicators using the indicator code in the following table:

<table>
<thead>
<tr>
<th>Impact area</th>

Response

*Banco Nación has the challenge of establishing its strategic objectives based on the impact analysis during the 1st semester of 2023*

c) SMART targets (incl. key performance indicators (KPIs)\(^{10}\)): Please disclose the targets for your first and your second area of most significant impact, if already in place (as well as further impact areas, if in place). Which KPIs are you using to monitor progress towards reaching the target? Please disclose.

Response

*Banco Nación has the challenge of establishing its strategic objectives based on the impact analysis during the 1st semester of 2023*

d) Action plan: which actions including milestones have you defined to meet the set targets? Please describe.

Please also show that your bank has analysed and acknowledged significant (potential) indirect impacts of the set targets within the impact area or on other impact areas and that it has set out relevant actions to avoid, mitigate, or compensate potential negative impacts.

Response

*Banco Nación's challenge is to establish an action plan based on the impact analysis during the 1st semester of 2023.*

**Self-assessment summary**

---

\(^{10}\) Key Performance Indicators are chosen indicators by the bank for the purpose of monitoring progress towards targets.

</tbody>
</table>

2.3 Target implementation and monitoring (Key Step 2)

For each target separately:
Show that your bank has implemented the actions it had previously defined to meet the set target.

Report on your bank’s progress since the last report towards achieving each of the set targets and the impact your progress resulted in, using the indicators and KPIs to monitor progress you have defined under 2.2.

Or, in case of changes to implementation plans (relevant for 2nd and subsequent reports only): describe the potential changes (changes to priority impact areas, changes to indicators, acceleration/review of targets, introduction of new milestones or revisions of action plans) and explain why those changes have become necessary.

Response

*Banco Nación has the challenge of establishing its strategic objectives based on the impact analysis during the 1st semester of 2023.*

---

**Principle 3: Clients and Customers**

*We will work responsibly with our clients and our customers to encourage sustainable practices and enable economic activities that create shared prosperity for current and future generations.*

3.1 Client engagement
Does your bank have a policy or engagement process with clients and customers\textsuperscript{11} in place to encourage sustainable practices?
\begin{itemize}
\item [\textbullet] Yes
\item [\textsquare] In progress
\item [\textsquare] No
\end{itemize}

Does your bank have a policy for sectors in which you have identified the highest (potential) negative impacts?
\begin{itemize}
\item [\textbullet] Yes
\item [\textsquare] In progress
\item [\textsquare] No
\end{itemize}

Describe how your bank has worked with and/or is planning to work with its clients and customers to encourage sustainable practices and enable sustainable economic activities\textsuperscript{12}). It should include information on relevant policies, actions planned/implemented to support clients’ transition, selected indicators on client engagement and, where possible, the impacts achieved.

\textit{This should be based on and in line with the impact analysis, target-setting and action plans put in place by the bank (see P2).}

\textbf{Response}

Banco Nación began a process whose medium-term objective is to incorporate sustainability policies, processes, practices and standards in the financing of activities and in investments, as well as within the entity; and finance projects and market proposals that contribute to achieving balanced and permanent growth, which generate direct and indirect support for the SDG framework. In particular, it promotes the transition towards a low-carbon economy and mitigating the effects of climate change, through energy efficiency measures and limiting greenhouse gas (GHG) emissions from the main polluting sectors of the industry. For this, the Bank has a specific area that coordinates the issuance of its own debt and that of third parties, in order to accompany sustainable economic development, in accordance with the demands that the actual productive system requires, intervening in the analysis and development of proposals regarding Sustainable Finance.

\textit{Sustainability report (p. 24)}

3.2 \textbf{Business opportunities}

Describe what strategic business opportunities in relation to the increase of positive and the reduction of negative impacts your bank has identified and/or how you have worked on these in the reporting period. Provide information on existing products and services , information on sustainable products developed in terms of value (USD or local currency) and/or as a % of your portfolio, and which SDGs or impact areas you are striving to make a positive impact on (e.g. green mortgages – climate, social bonds – financial inclusion, etc.).

\textbf{Response}

\textsuperscript{11} A client engagement process is a process of supporting clients towards transitioning their business models in line with sustainability goals by strategically accompanying them through a variety of customer relationship channels.

\textsuperscript{12} Sustainable economic activities promote the transition to a low-carbon, more resource-efficient and sustainable economy.
Although Banco Nación is in the process of analysing impacts according to the tools provided by UNEP FI, it already has products and services related to sustainable finance for the promotion of the SDGs.

Principle 4: Stakeholders
We will proactively and responsibly consult, engage and partner with relevant stakeholders to achieve society’s goals.

4.1 Stakeholder identification and consultation

Does your bank have a process to identify and regularly consult, engage, collaborate and partner with stakeholders (or stakeholder groups) you have identified as relevant in relation to the impact analysis and target setting process?

☐ Yes
☐ In progress
☐ No

Please describe which stakeholders (or groups/types of stakeholders) you have identified, consulted, engaged, collaborated or partnered with for the purpose of implementing the Principles and improving your bank’s impacts. This should include a high-level overview of how your bank has identified relevant stakeholders, what issues were addressed/results achieved and how they fed into the action planning process.

Response

The Bank has a constant dialogue with its main stakeholders, creating a transparent and trustworthy relationship. They are consulted during the materiality analysis process to define the Bank’s materiality matrix, prioritizing the relevant issues considered to be presented in the Bank’s Sustainability Report and to be managed as part of the Sustainability Strategy.

Principle 5: Governance & Culture
We will implement our commitment to these Principles through effective governance and a culture of responsible banking

5.1 Governance Structure for Implementation of the Principles

Does your bank have a governance system in place that incorporates the PRB?

☐ Yes
☐ In progress
☐ No

Such as regulators, investors, governments, suppliers, customers and clients, academia, civil society institutions, communities, representatives of indigenous population and non-profit organizations.
Please describe the relevant governance structures, policies and procedures your bank has in place/is planning to put in place to manage significant positive and negative (potential) impacts and support the effective implementation of the Principles. This includes information about

- which committee has responsibility over the sustainability strategy as well as targets approval and monitoring (including information about the highest level of governance the PRB is subjected to),

- details about the chair of the committee and the process and frequency for the board having oversight of PRB implementation (including remedial action in the event of targets or milestones not being achieved or unexpected negative impacts being detected), as well as

- remuneration practices linked to sustainability targets.

Response

The Bank committed to the effective implementation of the project "PNUD ARG20/003, Modernization of the Bank of the Argentine Nation: Integrity and Efficiency at the service of Human Development"; with the purpose of develop a comprehensive process of institutional strengthening and technological modernization. As first activity of the project in line with a sustainable future, the highest authority of the Bank signed a commitment with UNEP FI for the implementation of the Principles of Responsible Banking (PBR) in September 2020. The Sustainability Committee is in charge of monitoring the progress of the UNDP ARG20/003 project and the implementation of the PBRs. In addition, the Bank has a specific area, called Investment Banking, whose mission is to coordinate the activities related to the issuance of its own debt and that of third parties, in order to accompany sustainable economic development, following the demands that the modern productive system requires.

5.2 Promoting a culture of responsible banking:

Describe the initiatives and measures of your bank to foster a culture of responsible banking among its employees (e.g., capacity building, e-learning, sustainability trainings for client-facing roles, inclusion in remuneration structures and performance management and leadership communication, amongst others).

Response

The Bank has the Instituto de Capacitación Malvinas Argentinas, which accompanies professional development through permanent training, strengthening the labor skills required for each function, professionalizing management and contributing to the growth of the deal. In 2021, it launched the annual Training Plan with the objective of planning and systematizing the organizational learning process to contribute to the growth and strengthening of human capital, the main and most valuable component of the organization. Specifically, it has an induction course that includes a module on sustainability, leadership program, career plan, gender and diversity training with a focus on human rights, customer service training with a gender perspective and inclusion, among others. Besides, the Bank created the Financial Literacy Teachers network through which agents from various branches in the country are trained with the aim of
disseminating and promoting financial education throughout the national territory. Finally, within the framework of compliance with Principle No. 2, a workshop was held by external consultants on the implementation of the impact analysis tool provided by UNEP FI. Diverse areas of the Bank that will be in charge of assessing the information to define the sectors of impact participated in the workshop, and in an articulated way, work to achieve the objectives to be identified.

5.3 Policies and due diligence processes

Does your bank have policies in place that address environmental and social risks within your portfolio? Please describe.

Please describe what due diligence processes your bank has installed to identify and manage environmental and social risks associated with your portfolio. This can include aspects such as identification of significant/salient risks, environmental and social risks mitigation and definition of action plans, monitoring and reporting on risks and any existing grievance mechanism, as well as the governance structures you have in place to oversee these risks.

Response

The analysis parameters used in the economic, financial and technical feasibility analysis of the projects to be financed by the Bank are aligned with compliance with the SDGs, although there is still no specific structure and regulations of global scope in the Institution. The Project Evaluation area intervention is defined based on a concession loan amount (more than $210 MM). Loans for lower amounts are technically analysed by engineers, appraisers and financially by local analysts.

The Bank is working on the implementation of a system to address non-financial risks and impacts, but with potential costs for both society, the client and the entity. It is planned to present it to the Board of Directors for its approval, during the 1st semester of 2023.

Sustainability report (p. 34)

14 Applicable examples of types of policies are: exclusion policies for certain sectors/activities; zero-deforestation policies; zero-tolerance policies; gender-related policies; social due diligence policies; stakeholder engagement policies; whistle-blower policies etc., or any applicable national guidelines related to social risks.
Principle 6: Transparency & Accountability
We will periodically review our individual and collective implementation of these Principles and be transparent about and accountable for our positive and negative impacts and our contribution to society’s goals.

6.1 Assurance
Has this publicly disclosed information on your PRB commitments been assured by an independent assurer?
- ☐ Yes
- ☐ Partially
☐ X No
If applicable, please include the link or description of the assurance statement.

Response

6.2 Reporting on other frameworks
Does your bank disclose sustainability information in any of the listed below standards and frameworks?
- ☐ GRI
- ☐ SASB
- ☐ CDP
- ☐ IFRS Sustainability Disclosure Standards (to be published)
- ☐ TCFD
☐ X Other: Communication on Progress - Global Compact

Response

6.3 Outlook
What are the next steps your bank will undertake in next 12 month-reporting period (particularly on impact analysis\(^\text{15}\), target setting\(^\text{16}\) and governance structure for implementing the PRB)? Please describe briefly.

Response

_Banco Nación’s challenge is to establish its strategic objectives and goals based on the impact analysis during the 1st semester of 2023 and communicate them in the next 2022 Sustainability Report._

---

\(^{15}\) For example outlining plans for increasing the scope by including areas that have not yet been covered, or planned steps in terms of portfolio composition, context and performance measurement

\(^{16}\) For example outlining plans for baseline measurement, developing targets for (more) impact areas, setting interim targets, developing action plans etc.
6.4 Challenges

Here is a short section to find out about challenges your bank is possibly facing regarding the implementation of the Principles for Responsible Banking. Your feedback will be helpful to contextualise the collective progress of PRB signatory banks.

What challenges have you prioritized to address when implementing the Principles for Responsible Banking? Please choose what you consider the top three challenges your bank has prioritized to address in the last 12 months.

☐ Embedding PRB oversight into governance
☐ Gaining or maintaining momentum in the bank
☐ Getting started: where to start and what to focus on in the beginning
☐ Conducting an impact analysis
X Assessing negative environmental and social impacts
☐ Choosing the right performance measurement methodology/ies
X Setting targets
☐ Customer engagement
☐ Stakeholder engagement
☐ Data availability
X Data quality
☐ Access to resources
☐ Reporting
☐ Assurance
☐ Prioritizing actions internally
☐ Other: ...

If desired, you can elaborate on challenges and how you are tackling these:
Annex

The set of indicators has been developed using a Theory of Change approach considering the relationship between inputs, activities, outputs, short and long term outcomes in order to achieve impact. The Theory of Change for climate mitigation can be found here, the one for financial health & inclusion here. The Theory of Change approach allows to identify metrics and set targets which align with a bank’s maturity. The indicators are all connected to a bank’s impact and can be considered as necessary steps towards measuring impact. It is not expected that a bank is able to report on all indicators from the beginning, which is why a set of indicators for different levels on a bank’s implementation journey is provided.

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>A. Climate change mitigation</td>
<td>A.1.1</td>
<td>Climate strategy: Does your bank have a climate strategy in place?</td>
<td>Yes / In progress / No</td>
<td>A.2.1</td>
</tr>
</tbody>
</table>

---

17 It is not required from banks to work with the Theory of Change concept internally. In fact, the Theory of Change has been used to structure the requirements of setting SMART targets using relevant indicators.

18 Over time, indicators for more impact areas will be developed.

19 If possible and/or necessary, please contextualize the progress: Greenhouse gas emissions might even increase initially because the scope of measurements is extended and financed emissions from a growing proportion of the portfolio are measured, emission factors are updated etc. Emission reductions made by the clients should over time lead to a decrease in GHG emissions financed.
<table>
<thead>
